

Since 1990, the LiMaB team has been providing laser machining services and technology for a wide range of industries.

LiMaB GmbH has been a trusted contractor for companies of the following sectors:

- ★ Electronics and PCB production
- * Civil engineering
- * Apparatus production
- Medical technology

Our highly qualified and motivated workforce has accumulated a wealth of technical know-how and experience in the field of high-precision laser technology for the machining of delicate and demanding materials. The LiMaB team always welcomes the challenges posed by clients and strives to meet their expectations.

Our success is based on excellent quality, a clear focus on client needs, high precision and accuracy, unrivalled flexibility and short turn-around times. Certification according to DIN EN ISO 9001:2008 underpins our dedication to quality.

We are proud of the fact that any of our clients have ranked us as an "A" supplier. We appreciate their vote of confidence and continue working hard to remain a contractor in which industry can trust.

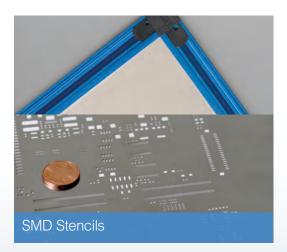

The LiMaB team along with the company's founder Günter Bartsch.
